

UNIVERSITY
OF WOLLONGONG
IN DUBAI

Step into the future of green hydrogen technology with UOWD's executive learning courses.

We are excited to offer three groundbreaking executive learning courses designed to propel your career in sustainable technology delivered alongside independent experts from Imperial College London, via Imperial Consultants:

Course 1

Green Hydrogen Generation and Storage Technology:

Master advanced methods for producing and storing green hydrogen.

13 April – 5 May 2026

Course 2

Green Hydrogen Technologies for Transportation:

Explore the world of hydrogen fuel cells and hydrogen-powered vehicles.

11 May – 9 June 2026

Course 3

Green Hydrogen Safety in a Sustainable Society:

Gain insight into the environmental and socio-economic impacts of hydrogen technology.

1 – 30 June 2026

Why Enrol?

Industry-Relevant Skills:

Tackle real-world challenges with hands-on projects and practical applications.

Flexible Online Learning:

Each online course consists of 20 hours of instructor-led training alongside self-paced readings.

Expert Instructors:

Learn from top academics and industry professionals from Imperial and UOWD.

Certification and Credits:

If you complete all 3 Green Hydrogen training courses you can apply for recognition of the equivalent 6 credit point university course towards the Master of Engineering Degree.
